

**Amendments to the Claims:**

This listing of the claims will replace all prior versions and listings of claims in the application:

**Listing of the claims:**

1. (currently amended) A method of making a Bowman-Birk Inhibitor concentrate, ~~consistently essentially of comprising~~ the steps of:

providing acid extracted solubles from a defatted soybean material;  
mixing acetone with the acid extracted solubles to form a precipitate, agitating the acetone-precipitate for about 1 hour and allowing the acetone-precipitate mixture to settle;  
separating the precipitate from the mixture of acetone and acid extracted solubles;  
washing the separated precipitate with acetone by slurring said separated precipitate in acetone and subsequently removing said acetone from said precipitate by vacuum filtering;  
diluting the separated precipitate with water to form an aqueous solution; ~~and~~  
ultrafiltering the aqueous solution to obtain a retentate; and  
drying the retentate to obtain the Bowman-Birk Inhibitor concentrate.

2-4 (canceled)

5. (original) The method of claim 1 wherein the defatted soybean material comprises defatted soybean flakes or defatted soybean flour.

6. (original) The method of claim 5 wherein said step of providing acid extracted solubles includes slurring the defatted soybean flakes with water to form a slurry.

7. (original) The method of claim 6 wherein said step of providing acid extracted solubles includes adjusting the pH of the slurry to 4.0 to 6.5 using hydrochloric acid.

8. (canceled)

9. (original) The method of claim 7, wherein said step of providing acid extracted solubles includes separating the acid extracted solubles from the slurry.
10. (original) The method of claim 1, wherein the amount of acetone mixed with the acid extracted solubles is between half and four times the amount by weight of the acid extracted solubles.
11. (original) The method of claim 10, wherein the amount of acetone mixed with the acid extracted solubles is 2 times the amount by weight of the acid extracted solubles.
12. (previously presented) The method of claim 1, wherein the amount of acetone mixed with the acid extracted solubles is between half and two times the amount by weight of the acid extracted solubles.
13. (original) The method of claim 12, wherein the amount of acetone used to wash the precipitate is half the amount mixed with the acid extracted solubles.
14. (canceled)
15. (original) A pharmaceutical composition or dietary supplement comprising the product made in accordance with the method of claim 1.
16. (original) A pharmaceutical composition or dietary supplement comprising the product made in accordance with the method of claim 7.
- 17-20 (canceled)
